

AV SYSTEM

8931-01

OVERVIEW AND OPERATION PROCESS

1. OVERVIEW

► Difference Between Audio System and AV System

Audio Head Unit

Audio System

Standard Specification: Audio

Option 1: 2-DIN player (Radio and CD player, No cassette deck)

Option 2: USB type MP3 jack (for multi jack station)

The multi jack station includes the clock and stereo jack (MP3 USB jack is optional).

The speaker system consists of 4 speakers (one in each door) and 2 tweeter speakers (above each front door). The radio antenna is attached on the tailgate.

The integrated type antenna is not available.

AV Head Unit

AV System

Radio, CD/Cassette/MP3, TV and DVD system are available.

The USB type MP3 jack is installed as the standard specification. If the navigation is installed, the GPS antenna is attached on the rear section of the roof.

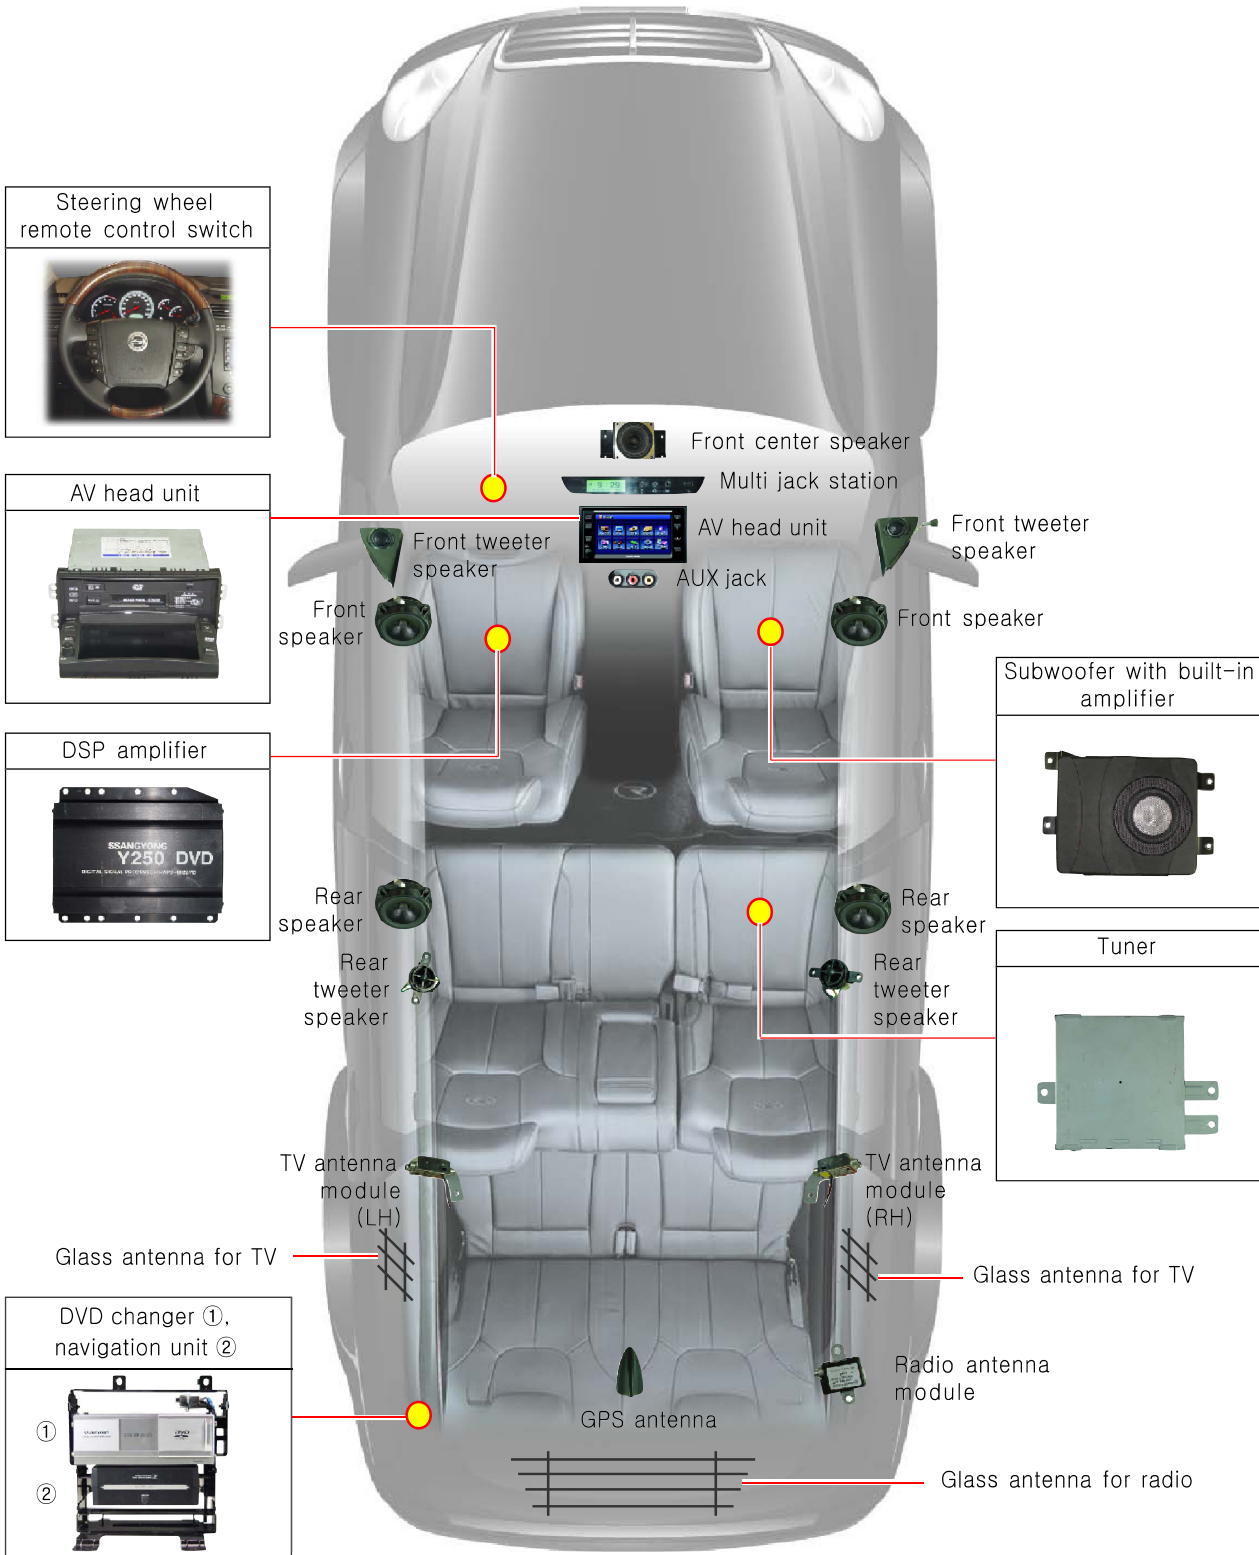

The speaker system consists of 1 center speaker, 4 door speakers (one in each door) and 2 tweeter speaker (one in each door) and 1 woofer under the passenger seat.
